PRESS RELEASE

Tradestar Resources Corporation Announces Results of Recompletion in Hysaw-Hobson Field

HOT SPRINGS, AR--(MARKET WIRE)--Sep 14, 2006 -- Tradestar Resources Corporation (Other OTC:[TSRR.PK](#) - [News](#)) announced today that their recompletion efforts for the Hysaw-Hobson #2A was finished on September 5th, and the well has been producing an average of 20 barrels of oil per day.

The Company has also completed the acquisition of the Hysaw-Hobson #6A which includes 63.8 acres and provides a "First Right of Refusal" for an additional 600 acres offsetting the Hysaw-Hobson Field. Recompletion procedures are already in place on this well and it is expected that the well will be in production within the next two weeks.

Tom Feimster, President of Tradestar, states that the recompletion on #2A shows very exciting results from the procedures performed, and the addition of the #6A will also very likely increase our daily production from the Hysaw-Hobson Field and give us larger reservoir potential in our expanded field position.
