### **Tradestar Resources Announces Texas and Louisiana Remedial Well Workovers – Update in Operations**

HOT SPRINGS, AR--(MARKET WIRE)--Oct 12, 2006 -- Tradestar Resources Corporation (Other OTC:TSRR.PK - News) is pleased to announce that during the last two weeks, the company has put on line the Hysaw Hobson #6A in Karnes County, Texas. The Hysaw Hobson Field is expected to average 45 Barrels of Oil Per Day and net 1300 Barrels in October.

The Company has also begun a comprehensive remedial work over plan for their property holdings in the "Delhi South Field" located in Franklin and Richland Parishes, Louisiana. Workovers have already been completed on the Holt #10 (resulting in 14 barrels oil per day). The Holt #24 and the Strahan #1 will be on line this week with production results to be reported soon. Additional remedial well workovers and lease equipment improvements in the field are planned and scheduled over the next few weeks.

Tradestar Resources Corporation President Tom Feimster said, "Growth is our main goal. The company's production levels are steadily increasing, while targeting new horizons and further developments."
