## **PRESS RELEASE**

### **Tradestar Resources Corporation Announces Production of Well in Karnes County**

HOT SPRINGS, AR--(MARKET WIRE)--May 8, 2007 -- Tradestar Resources Corporation (Other OTC:[TSRR.PK](#) - [News](#)) is pleased to report that the Janssen #1A well in Karnes County, Texas has been put into production status as of Monday, April 30, 2007.

The well was perforated at approximately the 10,300 ft. interval in the Roeder Sand (Wilcox Sand Series). The well was perf'd with 6,000 ft. of water fluid in the tubing to help prevent any extreme gas pressure blowing the perf tools up the hole. The well went on a low vacuum at once, but after a few days of slow open flowback and also a fluid swabbing procedure in the tubing, the well began to show good gas flow. There is still some leveling off period before the estimated daily gas flow rate can be established, but the well has been flowing at an average rate of 330 thousand cubic feet of gas per day for last five days along with 10 to 20 barrels of high grade condensate.

The Janssen has a gas sales contract that fluctuates monthly with the Houston Ship Channel price index and the liquid condensate will be sold at the monthly spot price for product in the regional Texas area. Tradestar and the other Participating Partners should expect revenue distribution in the first week of July for the hydrocarbon products sold from the Janssen #1A well.

Management is pleased to have this gas well in the growing portfolio of good properties that should produce revenue for many years to come.

About Tradestar:

Tradestar Resources Corporation is an independent energy company that is engaged in the exploration, development, exploitation and acquisition of on-shore and natural gas properties in conventional producing areas in the United States. Tradestar strives to enhance asset value by expanding oil and natural gas reserves raising production levels and increasing cash flow. Tradestar intends to foster its growth as an independent oil and gas company by investing in only proven producing wells. The company's web site is <http://tradestar-corp.com>.
